

Position Description: Peer Navigator

Characteristics of the position

The Peer Navigator Program is a dynamic program situated within Living Positive Victoria's suite of peer support services. The peer support service is staffed by a multi-disciplinary team of people who work together to provide care and support to people living with HIV (PLHIV) across Victoria. The goal of the Peer Navigator Program is to promote the health and well-being of all PLHIV in order to build an individual's capacity to self-manage their HIV, build their resilience and enjoy optimal health and wellbeing.

The primary role of the Peer Navigator is to provide individualised, client-centred support for PLHIV who are newly diagnosed, re-engaging in care or have complex needs. This will require the delivery of interventions that promote treatment readiness, treatment adherence, retention in care and improved individual health outcomes. A further aim is to foster personal resilience, improved health literacy and emotional wellbeing.

The delivery of these interventions will involve one-on-one client engagement in high HIV caseload clinics and community settings, as well as the coordination and facilitation of peer led group workshops and social support groups. The role will provide an individualised, outcome focused service that supports PLHIV in navigating the complexity of HIV healthcare and offers seamless care coordination with other Living Positive Victoria services and referrals to other services as required, under the supervision of the Manager Peer Support.

The Peer Navigator Program undergoes rigorous monitoring and evaluation. The position will involve data collection and analysis, under the direction of senior staff and an external research organisation.
